

**WHO/UNICEF
Review of National Immunization Coverage
1980-2008**

Kiribati

July, 2009

Kiribati

BCG (1980-2008)

Description of trend

Estimated immunization coverage levels are based on reported data. The decline in coverage in 2007 is due to a one-month national stock c

Data presented in chart

Year	WHO/ UNICEF estimate (%)	Reported to:*		Government official estimate (%)	Reported doses administered (%)**	Survey data (%)***

2007	90	90	90	90	90		
2008	83	83	83	83	83		

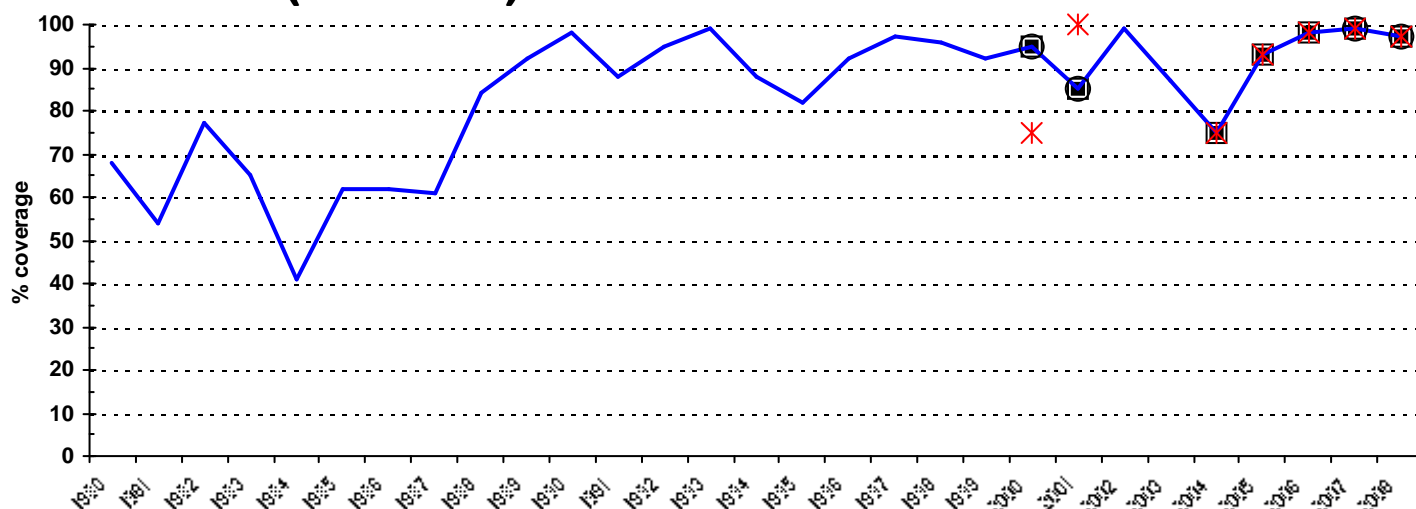

*Prior to 1998 national reports to WHO/UNICEF did not specify whether information was derived from administrative records, surveys or other sources.

**Coverage based on registration of doses administered by health care providers.

***In case more than one survey was implemented in a certain year the highest value is presented. Details of all data are presented in the second section of this report.

Kiribati

DTP1 (1980-2008)

Description of trend

WHO and UNICEF began requesting data on DTP1 coverage in 2001 and have received national reports reflecting DTP1 coverage from 2001 onward. The DTP1 estimates for those years are based on these reports. For years prior to 2000 the estimates are derived from the WHO UNICEF estimates of DTP3 and the relationship between the levels of DTP3 coverage and the drop-out between DTP1 and DTP3. This relationship results from an analysis of 282 surveys conducted in 101 countries which were published between 1980 and 2004.

Data presented in chart
